Ent Services Pvt. Ltd.

About Us

We are an organization committed to delivering valuable services in the fields of IT Hardware and Technical Manpower solutions across Active and Passive domains, providing our customers with cost-effective engagements without compromising on quality.² Supported by a team of technology professionals with over 15 years of diverse experience across leading companies and technologies in IT Collaboration, Active, and Passive industries, we bring deep expertise, innovation, and proven capability to every project we undertake.

What we do

We provide end-to-end solutions in IT Hardware, Active & Passive Networking, and Technical Manpower services, enabling organizations to build, scale, and secure their IT infrastructure. Our offerings cover the complete technology lifecycle—from design, supply, and implementation to operations, support, and managed services.

With a strong focus on quality, reliability, and cost-effectiveness, we specialize in:

- IT Hardware Supply & Integration – Servers, Storage, Workstations, Network Devices, and Surveillance Systems.
- Active & Passive Networking Solutions – Switching, Routing, Structured Cabling, and Data Center Infrastructure.
- Technical Manpower Services – Certified engineers, system administrators, and project specialists for on-site and remote support.
- Collaboration & Security Solutions – Video conferencing, access control, and integrated surveillance.
- Comprehensive AMC & Support – Ensuring long-term system reliability, performance, and customer satisfaction.

Why choose us

- **Proven Expertise** – Backed by strong industry experience in IT hardware, networking, and manpower services.
- **Skilled Technical Workforce** – Certified professionals with hands-on expertise in managing complex IT and surveillance projects..
- **End-to-End Solutions** – From design and deployment to operations and AMC, we deliver complete IT infrastructure support under one roof..
- **Quality & Reliability** – Commitment to global standards, ensuring high performance without compromising on quality.
- **Customer-Centric Approach** – Flexible, cost-effective solutions tailored to meet specific client requirements.
- **Long-Term Partnership** – Focus on building sustainable relationships based on trust, transparency, and value creation.

To be a trusted leader in delivering innovative IT hardware solutions and skilled technical manpower, empowering organizations with reliable infrastructure, seamless operations, and sustainable growth in the digital era

Vision

Mission

Our mission is to provide high-quality IT hardware products that meet global standards of performance, reliability, and security while delivering skilled and certified technical manpower capable of managing and supporting complex IT and surveillance projects; to partner with clients as a one-stop technology enabler offering cost-effective and future-ready solutions; to maintain excellence in service delivery through continuous training, innovation, and customer-centric practices; and to build long-term relationships based on trust, transparency, and value creation.

Passive Infrastructure Solutions

JINJI delivers **end-to-end passive infrastructure solutions**, covering structured cabling, fiber optics, data center cabling, racks, Access control, CCTV, Office networking and pathways that form the backbone of modern IT environments. Our solutions are designed for **scalability, performance, and reliability**, enabling seamless integration of voice, data, and video across enterprises.

With proven expertise and adherence to global standards, JINJI ensures that every passive layer we implement supports **high availability, optimized performance, and future-ready expansion** for your IT infrastructure.

Active Network Solution

- JINJI specializes in the **planning, design, implementation, and maintenance** of active networks for campus and office environments. Our offerings cover the entire spectrum of **routing, switching, campus Wi-Fi, and network security**, ensuring robust and future-ready connectivity.
- As a **preferred partner for leading global brands** in active components, we deliver **customized care packs and after-sales support packages** to effectively manage and optimize your network, providing seamless performance and reliability.

25

Security And Surveillance

Partnering with industry leading manufactures, JINJI's experts design and implement comprehensive video surveillance system solutions that integrate with your IP network.

Our solutions help protect your company's key assets, prevent crime, eliminate intellectual property breaches, decrease vandalism,²⁶ and prevent physical network access.

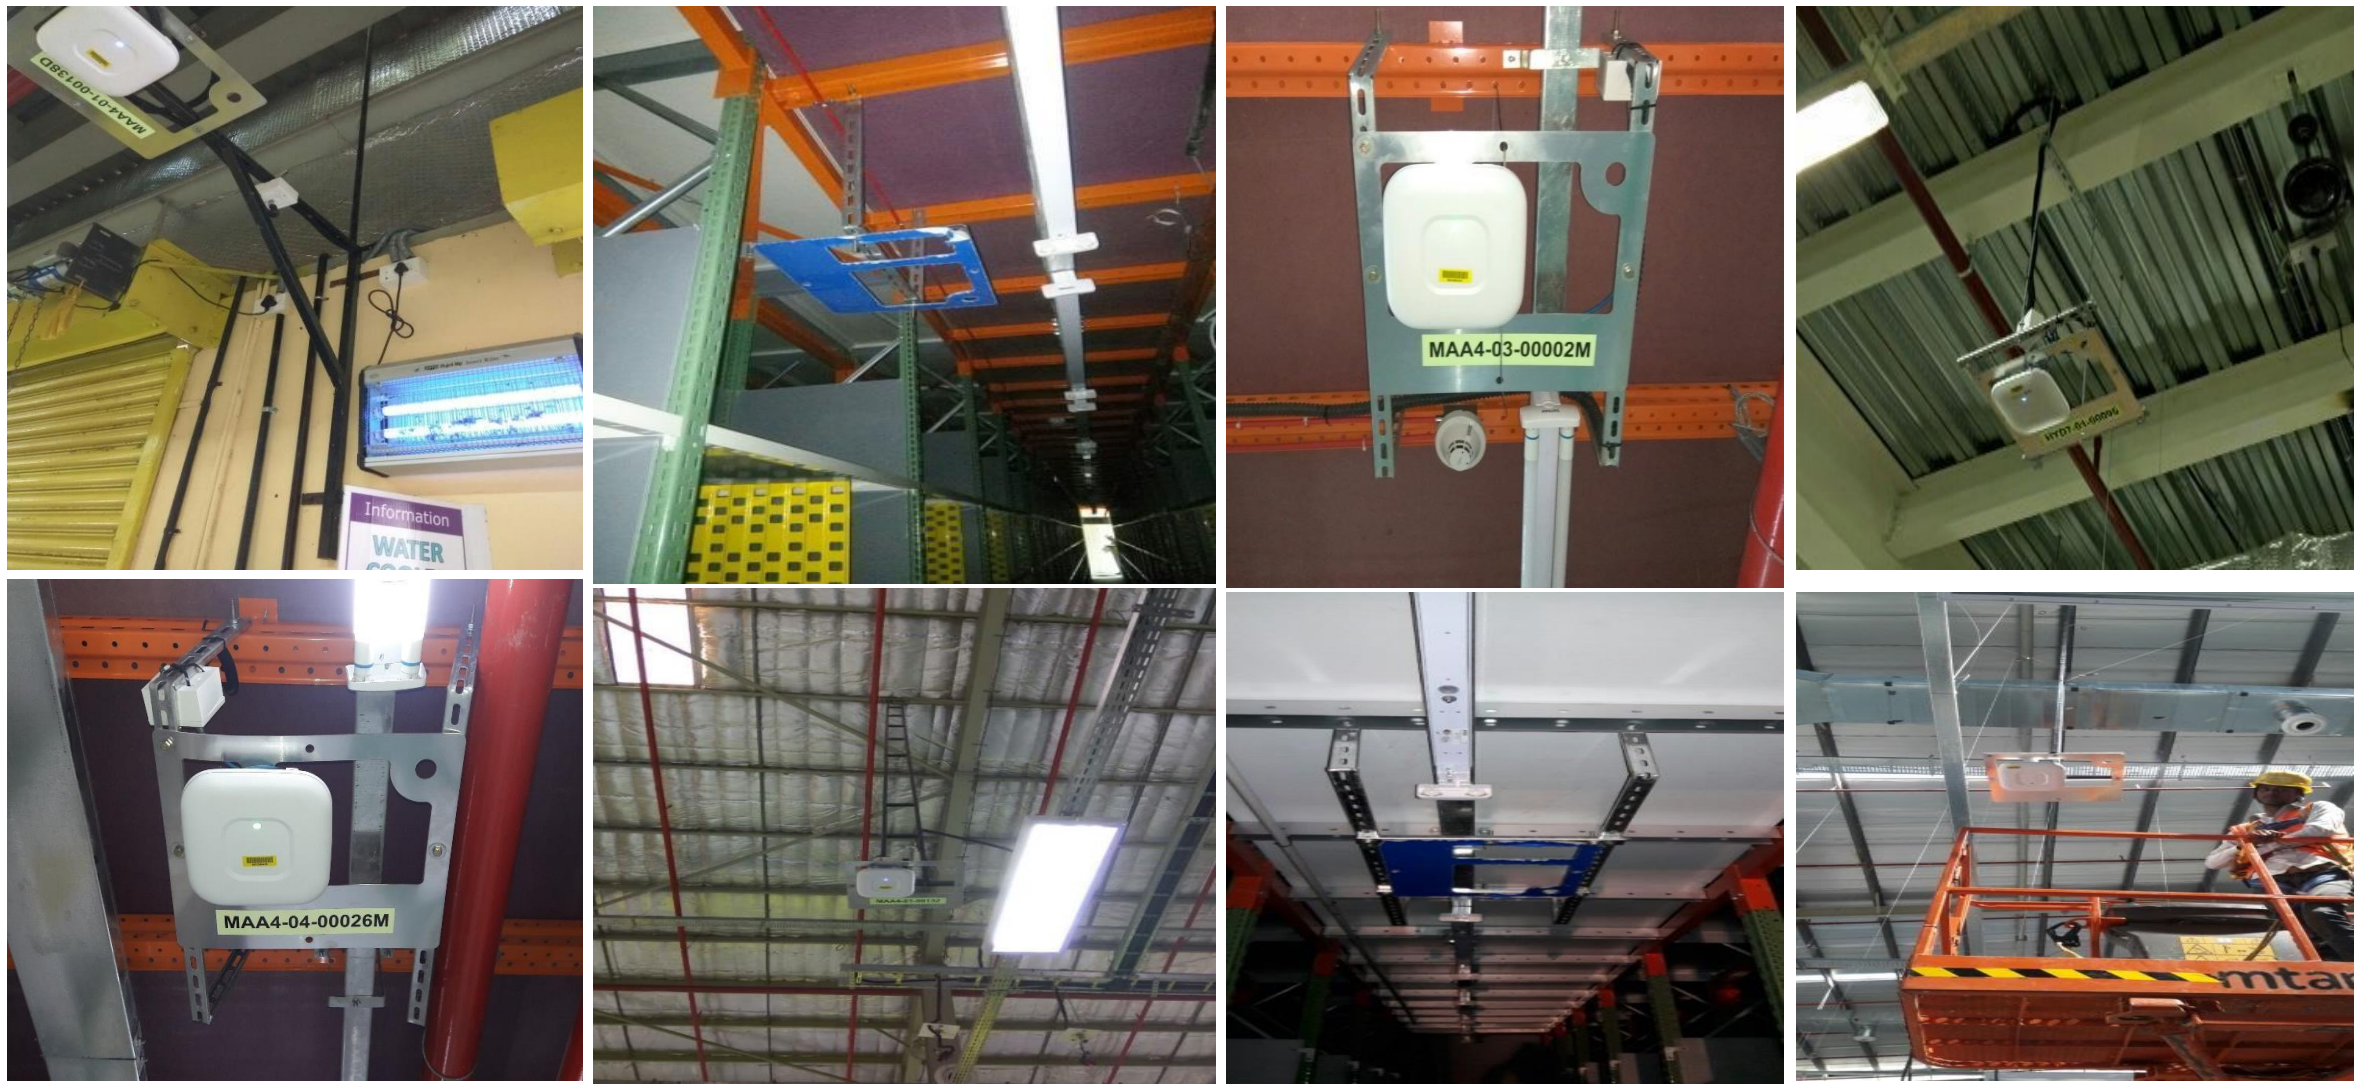

We help combine the best hardware and applications to keep your assets secure
